EXAMINER'S AMENDMENT / REASONS FOR ALLOWANCE

Claims 1-13 and 28-33 are allowed.

The application having been allowed, **formal drawings are required** in response to this Office Action.

An **examiner's amendment** to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Karen Canady on 4/23/01.

The application has been amended as follows:

In claim ~~7~~ the phrase "the cell" has been changed to -the non-plant cell—

In claim ~~8~~ the phrase "the cell" has been changed to -the non-plant cell—

In claim ~~9~~ the phrase "the cell" has been changed to -the non-plant cell—

In claim ~~11~~ the phrase "the cell" has been changed to -the non-plant cell—

In claim ~~31~~ the phrase "the cell" has been changed to -the non-plant cell—

In claim ~~33~~ the phrase "the cell" has been changed to -the non-plant cell—

The following is an examiner's statement of **reasons for allowance**: In review of the art at the time of the invention, the understanding of how secretory antibodies are assembled and secreted was understood to be a quite complex process involving differing types of cells and processing. The art does not teach or suggest that such antibodies could be produced by the simple transfection of an antibody producing (non-plant) cell with DNA encoding secretory component. Nor would one of ordinary skill in the art have expected any resulting antibodies to be functional. Therefore, the methods of the invention are novel and unobvious over the art of record.

Any comments considered necessary by applicant must be submitted **no later than the payment of the issue fee** and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
